

SA54-4-SUB SMALL APERTURE® SERIES

(4) 5.25" ULTRA SLIM DEPTH IN-WALL SUBWOOFER - 4" OR 5" OPENING

(4) 5.25" (133 mm) Ultra-Slim Subwoofer

The James Loudspeaker SA54-4-SUB is an in-wall subwoofer designed to be concealed from view. Like all speakers in the SA series a small opening in the wall or ceiling is the only visible portion of the speaker giving the series its name: Small Aperture. The 3.4-inch depth allows the speaker to be placed within 2x4in-studded walls and be concealed by drywall, while a 4 or 5-inch opening is the only visible portion of the speaker.

The SA54-4-SUB is built using aircraft grade aluminum and has a quarter-inch thick back plate to ensure maximum durability and limit the rear sound transmission. The speaker comes with bracket mounts to secure the frame to wall studs and ensure that it is firmly locked in place. Four high power 5.25" woofers with 1.5" voice coils ensure high power handling, delivering powerful, deep bass to compliment any Small Aperture speaker system.

Order grille kits separately.
