

To Users

Thank you for choosing the AWOL VISION 4K TriChroma Ultra Short Throw Laser . For your security and interest, please read this manual carefully before using the product. To ensure safe and correct use of this product, always comply with the following precautions to avoid dangerous situations and damage to your unit:

The lightning flash with an arrowhead symbol within an equilateral triangle is intended to alert the user to the presence of dangerous voltage within the product's enclosure. The dangerous voltage may be of sufficient magnitude to constitute a risk of electric shock.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

Illustrations of the product, accessories, and user interface in the user manual are for reference purposes only. Actual product and functions may vary due to product enhancements.

Compatibility with 3rd party products, software and services are not guaranteed. We cannot be held liable for any damage or loss suffered while operating, using or connecting to incompatible devices or apps.

The recording and playback of content on this device may require permission from the owner of the copyright or other such rights in that content. It is your responsibility to ensure that your use of this device complies with applicable copyright legislation in your country.

Safety Instructions

Ambient Conditions for this Device

This device must be used in a home or office environment. It must not be used in rooms with high levels of humidity or dust concentration.

High humidity and dust concentration may lead to current leaks in the device. To reduce the risk of fire or electrical shock:

- Do not expose this unit to rain, moisture, dripping or splashing water, and do not place objects filled with liquids, such as vases, cups, etc. on or over the unit.
- Do not touch the device with wet hands.
- Do not expose the device to direct air-conditioning and keep candles or other flames away from the device at all times.
- If used outside, make sure it is protected from moisture.

Installation

Never place a AWOL VISION 4K TriChroma Laser in an unstable location. The product set may fall, causing serious personal injury or death. Many injuries, particularly to children, can be avoided by taking simple precautions such as:

- Using cabinets or stands recommended by AWOL VISION.
- Only using furniture that can safely support the product set.
- Ensuring the product set is not overhanging the edge of the supporting furniture.
- Not placing the product set on tall furniture (for example, cupboards or bookcases) without anchoring both the furniture and product set to a suitable support.
- Not placing the product set on cloth or other materials that may be located between the product set and supporting furniture.
- Educating children about the dangers of climbing on furniture to reach the product set or its controls.

If your existing product set is being retained and relocated, the same considerations as above should be applied.

Power Supply

Incorrect voltages can damage the device. Only connect this unit to a power supply with the correct voltage and frequency noted on the type plate, using the supplied power cable.

- Do not overload the power outlets by connecting too many appliances to the same outlet. Overloaded wall outlets, extension cords, etc. are dangerous and can result in electric shock and fire.
- By means of a power cord connected to a socket-outlet with earthing connection.
- Do not touch the power plug with wet hands.
- Do not place heavy objects on the power cable. Route the cable so that it is not kinked or laid over sharp edges, walked on or exposed to chemicals. A power cable with damaged insulation can cause electric shock and fire.
- Pull the power plug, NOT on the cable when disconnecting. The cable can become damaged and cause a short circuit if pulled on.
- Do not place the power cable near a high temperature object.
- Do not use a damaged or loose power cable, or a damaged socket outlet.
- As long as the power plug is connected to a live socket outlet, the device will consume power even in standby mode. The power plug should be disconnected during long periods of absence.

Air Ventilation and High Temperatures

Install your device only where there is proper ventilation, and ensure that there is at least 7.8 inch(20 cm) of free space on the sides and 5.9 inch(15 cm) of free space on the back of the unit for air circulation. Excessive heat and obstruction of ventilation could lead to fire or early failure of some electric components.

- Do not block any ventilation openings with newspapers, tablecloths, curtains, etc.
- Do not touch the ventilation openings, they may become hot
- Do not insert foreign objects into the device through the vents..

Cleaning and Care

Clean the device, the screen, and the remote control with a soft, moist, clean and natural cloth only, do not use any chemicals.

- Unplug the power cord prior to cleaning the device.
- Do not use insect repellent, solvent, thinner or other volatile substances on the surface of the AWOL VISION 4K TriChroma Laser. This may degrade the surface quality. Do not spray water or other liquids directly on the device. Liquid inside the device could lead to product failure.

Service and Repair

Risk of electric shock when opening the device.

- Never remove the cover/back of the device, there are no user serviceable parts inside.
- Refer all service to qualified service personnel.
- Do not attempt to modify this product in any way. Unauthorized modification could void the warranty of this unit or cause electric shock and fires.
- If this device requires a repair, please wear laser eye protection with an optical density OD that is 4 or higher and has a wavelength of 459-651nm.

Remote Control Batteries

Incorrect installation may cause battery leakage, corrosion, and explosion.

- Replace only with the same or equivalent type, do not mix old and new batteries.
- Do not mix different battery types.
- Do not use rechargeable batteries.
- Do not burn or break up batteries.
- Discard batteries in a designated disposal area.
- Do not expose batteries to excessive heat such as sunshine, fire, or the like.
- If you do not intend to use the remote control for a long time, then remove the batteries.

Laser

You risk being exposed to laser radiation if you manipulate or alter the product in a way not specified in the user manual. Do not look directly at the lens when this device is on because the laser light may damage your eyes.

- This product comes with a laser module. Do not tear or modify this device in any manner; otherwise, it may result in personal injury.

As with any bright light source, DO NOT STARE INTO THE BEAM

$\lambda = 459\sim 471\text{nm}/519\sim 531\text{nm}/635\sim 651\text{nm}$

Wavelength 459~471nm/519~531nm/635~651nm

CLASS 1 LASER PRODUCT

Complies with IEC 60825-1: 2014 and IEC 62471-5: 2015

- The Device complies with US FDA performance standards in 21 CFR 1040.10 and 1040.11 except for conformance as a Risk Group [0,1 or 2-Select appropriate RG] LIP as defined in IEC 62471-5: Ed.1.0. For more information see Laser Notice No.57, dated May 8, 2019.

- If this device requires a repair, please wear laser eye protection with an optical density OD that is 4 or higher and has a wavelength of 459-651nm.
